PISCIFUN CARBON R1

Carbon Fiber Fishing Rod | Product Features

Next-generation carbon fiber construction combines a lightweight integrated handle, enhanced sensitivity and greater casting distance for comfortable, controlled fishing.

LIGHTWEIGHT INNOVATION

Construction	Carbon Monocoque design with an integrated handle and reel seat
Weight reduction	28% lighter than cork models with the same rod configuration
Benefits	Smoother casting, increased sensitivity and reduced fatigue

ENHANCED SENSITIVITY

Technology	SSR technology
Sensitivity	3 times more sensitive than the Piscifun Serpent series
Resistance	Increased resistance to twisting, breaking and temperature changes

EXCEPTIONAL CASTING DISTANCE

Blank	IM8 Toray carbon fiber blank supported by SSR technology
Guides	Fuji tangle-free guides with Alconite rings
Line release	Stable vibration and smooth line release
Casting distance	35% greater casting distance than the Piscifun Serpent series

POWERFUL & PRECISE HANDLING

Handle	Streamlined shape for improved grip and comfort
Control	Designed to support confident handling while fighting fish

Source: User-provided product description. Weight comparison is against cork models with the same rod configuration; sensitivity and casting-distance comparisons are against the Piscifun Serpent series.
